SUMMARY

Data Analyst with a background in Sustainable Development Engineering and skills in handling and analyzing data with Python, Excel, VBA and SQL from *Tecnológico de Monterrey* Data Analytics and Visualization Bootcamp. Passionate about analyzing large sets data from different fields to generate useful insights and help to make better decisions in organizations to the creation of shared value.

TECHNICAL SKILLS

Languages: Python, SQL

Data Manipulation & Visualization: pandas, matplotlib, plotly.js, D3.js, Tableau, spark

Machine Learning: scikit-learn

Database: PostgreSQL, MongoDB

Other: Flask, Git, command line

PROJECTS

Global Pollution | <https://github.com/velazquez-Ivan96/Global-Pollution-Project>

- Analyzed the exposure to air pollutants and death rate due to air pollution
- Pulled data from OCDE API and used data from Our World in Data to assemble dataset.
- Summary statistics and visualizations created using python(plotly, pandas, seaborn, matplotlib) and Google API for map visualization.

Climate analysis and app | <https://github.com/velazquez-Ivan96/Advanced-Data-Storage-And-Retrieval>

- Analyzed climate conditions such as precipitation, temperature, rainfall and stations.
- Designed a Flask API with routes based on the initial analysis
- Summary statistics, visualizations, Flask API created using Python, Pandas and SQLAlchemy

Web application | <https://github.com/velazquez-Ivan96/Web-scrapping-Mars-Project>

- Designed a web app related to *Mission to mars* project
- Scrapped data from different websites, send it to a Mongo database and display it in a single html.
- Flask application, html page created using Python, BeautifulSoup, pandas, MongoDB, and splinter.

EDUCATION

Data Analytics and Visualization Bootcamp

Tecnológico de Monterrey, Mexico City

A 24-week intensive program focused on gaining technical skills for data analysis and visualization such as Excel, VBA, Python, Pandas, Matplotlib, Tableau, PostgreSQL, MongoDB, Flask and D3.

Sustainable Development Engineering

Tecnológico de Monterrey, Mexico City

Bachelor degree focused on the efficient use of energy and resources, use of waste and design of corporate sustainability strategies. Special focus on the use of renewable technology.

EXPERIENCE

Grupo Modelo
Project developer

8/2018 – 12/2018
Mexico City

- Investigated the physical and chemical properties of beer bagasse to return it to its value chain
- Prepared a business case for *Grupo Modelo* to take advantage of beer bagasse as a complement in papermaking.
